

AUSTRALIAN OFF ROAD

2026 Model Range

**Living the dream
since 2000**

**25+ years proven off road.
100% made by AOR.
Dust free guarantee.
6 year warranty.
5 year roadside assist.
Australia wide service network.**

"The capability of our Q+ is what we are always happy to talk to others about and is the mainstay of our support for AOR, but the Quality of service support is what has really kept my wife & I committed to AOR and why we became ambassadors. This support network is like nothing anyone with other vans has ever mentioned to us. Keep it up!"

- Ian G

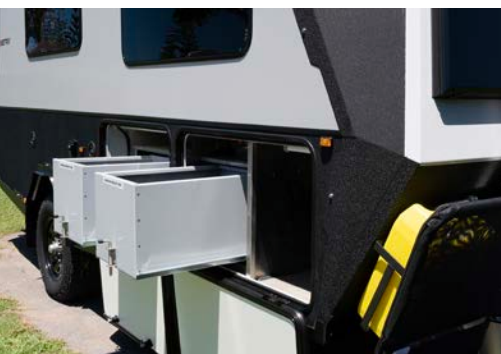

Sunset over Birdsv

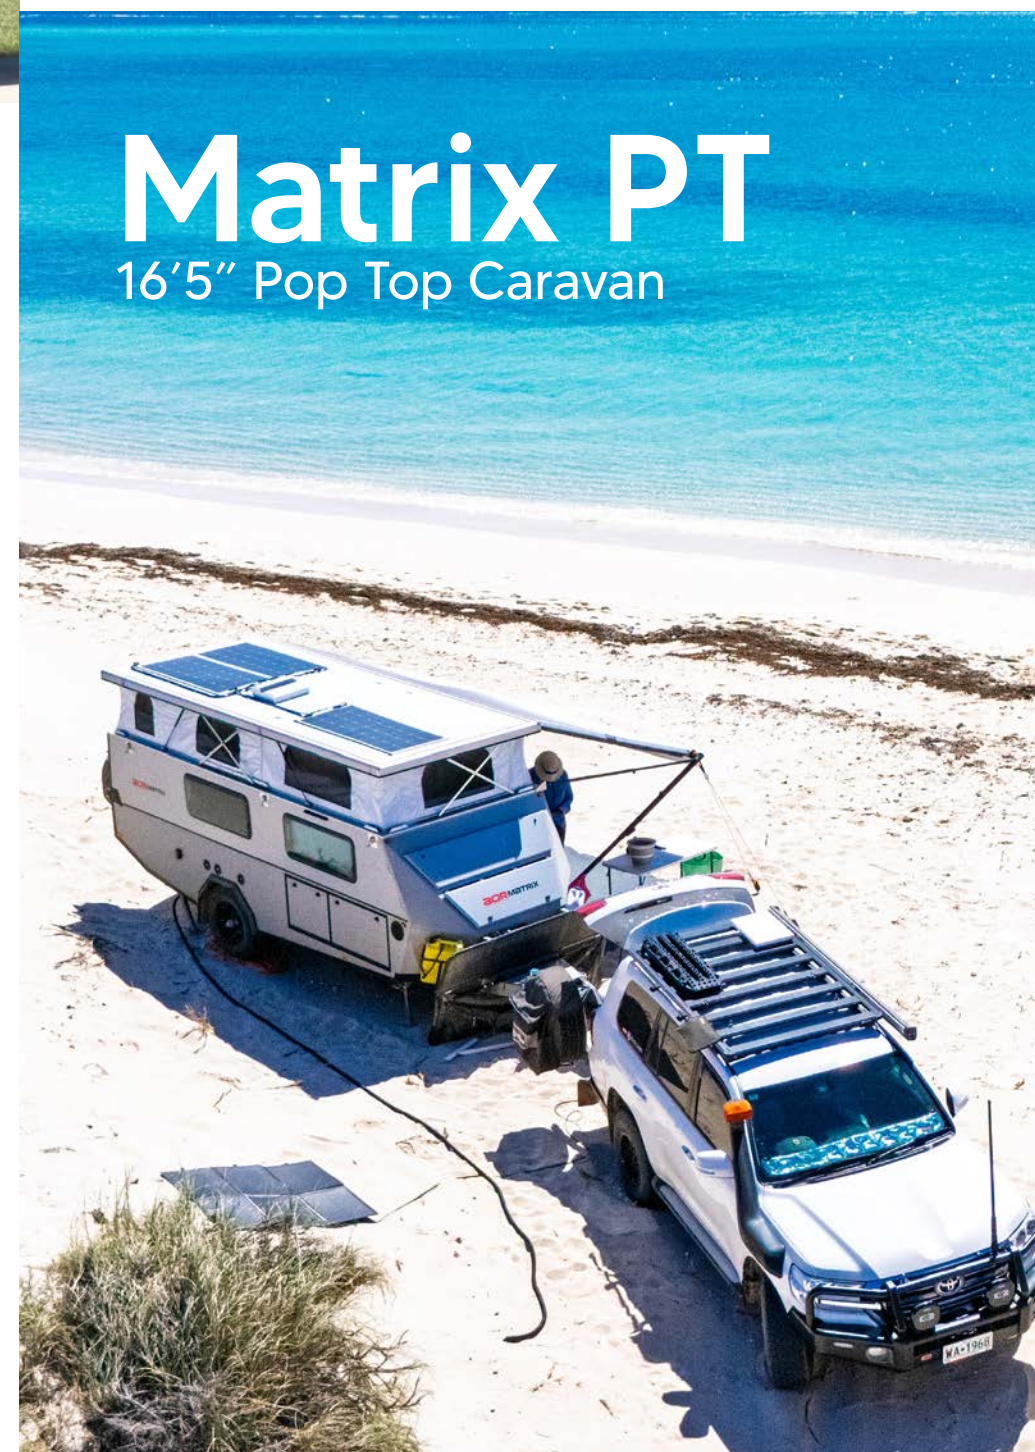

Matrix

17'6" Full Height Caravan

SOLAR	525W (700)
BATTERIES (Lithium)	600
CHARGER (AC, Vehicle & Solar)	30amp (50, 75, 100amp)
BASE MODEL PRICE \$	136,900
Q FAMILY FROM \$	138,900

Quantum Family

Built for families who don't want to compromise on where they go or how they travel, the Quantum Family brings extra sleeping space into the same proven off road platform. With integrated bunks, there's room for everyone - without sacrificing capability, comfort, or storage.

It's everything you love about the Quantum, now designed to take the whole crew further.

Quantum

14' Pop Top Camper

The first hybrid camper and still the best. Australia's most self-sufficient, elegant, off road hybrid camper.

MASTER BED CONFIGURATION	Queen (twin single)
BUNK OPTION	1
COOKING	Optional induction or gas
FRIDGE	External 82L chest fridge/freezer
AMENITIES	Internal shower & composting toilet
OFF ROAD SUSPENSION	Dual shock + airbags (self levelling)
BRAKES	Disc brakes
INVERTER	3000W
WATER & AIR HEATING	Diesel combi (separate)
WATER TANKS	265L
COOLING	2x 12V fans (A/C rooftop, underbunk conditioning)
SOLAR	525W (700*)
BATTERIES (Lithium)	600
CHARGER (AC, Vehicle & Solar)	30amp (50, 75, 100amp)
BASE MODEL PRICE \$	127,900

Odyssey
11' Pop Top Camper

Odyssey Signature

Compact, yet packed with features including an internal toilet & shower.

MASTER BED CONFIGURATION	Queen
BUNK OPTION	N/A
COOKING	Optional induction or gas
FRIDGE	Internal upright 130L fridge/freezer
AMENITIES	External pod, portable (composting)
OFF ROAD SUSPENSION	Dual shock + airbags (self levelling)
BRAKES	Disc brakes
INVERTER	2000W (3000W)
WATER & AIR HEATING	Diesel combi (seperate)
WATER TANKS	265L
COOLING	2x 12V fans (A/C rooftop) conditioning)
SOLAR	525W (700*)
BATTERIES (Lithium)	300 (600)
CHARGER (AC, Vehicle & Solar)	30amp (50, 75, 100amp)
BASE MODEL PRICE \$	98,900
SIGNATURE \$	105,900

25+ years of off road evolution.

The Evolution of the Quantum

From Australia's first hybrid to a fully electric, off grid powerhouse

When the Quantum launched in 2008, it didn't just introduce a new product - it created a new category. As Australia's first hybrid camper designed for outback travel, it redefined what was possible, combining true off-road capability with practical, liveable design.

At a time when traditional campers dominated, the Quantum stood apart as a purpose-built solution for harsh Australian conditions. It quickly became a benchmark, inspiring the wave of hybrid campers seen across the market today.

Built on a Proven Foundation

The original Quantum featured an aluminium framed pop-top, later evolving in 2014 to a lighter, stronger fibreglass body with refined internal materials. Cabinetry transitioned to aluminium for durability and weight savings, while the proven chassis and suspension have remained largely unchanged - a testament to the strength of the original design.

Continuous Innovation

Years of real-world testing by thousands of owners have shaped the Quantum into what it is today. What began as a simple, capable camper has evolved into a refined off road system designed for greater comfort and extended off grid travel.

Then vs Now

Today's Quantum reflects a new era of capability. Induction cooking replaces gas, supported by a 600Ah lithium battery, 3000W inverter, and 525W solar system - all managed by advanced Redarc electronics. Earlier models relied on gas, smaller gel batteries, and minimal solar, highlighting just how far the platform has come.

The Quantum E

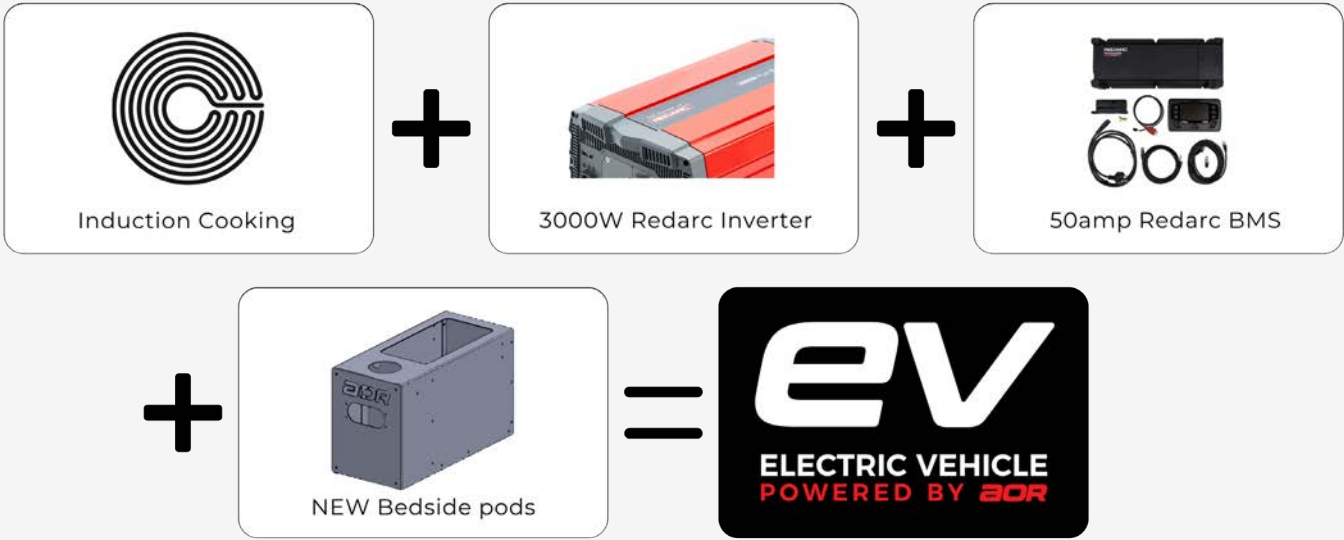

The latest evolution, the Quantum E, delivers a fully electric, gas-less experience. With advancements in solar and power systems, it offers a quieter, cleaner, and more efficient way to travel off-grid.

A Legacy That Continues

Every AOR model today is a direct descendant of the original Quantum. From its beginnings in 2008 to today's fully electric platform, it remains the blueprint - continuously refined, yet grounded in durability, simplicity, and real-world capability.

	QUANTUM NOW	QUANTUM THEN
COOKING	Induction	Gas 3 burner
BATTERY	600amp lithium	120amp gel battery
INVERTER	3000W	300W
SOLAR	525W	2 x 120W
CHARGER (AC, Vehicle & Solar)	50amp	Didn't exist

AOR's next step in off road evolution is here. Fully electric capable. Cook, power and live - entirely off grid. No gas.* No compromise. Just a smarter, quieter, more capable way to travel.

"With our latest development of the Quantum 'E', we've once again embraced advancements in solar and electronics to enhance the experience for serious outback travellers. This package allows for complete gas-less cooking, both internal and external, supported by the latest in power systems. I hope you will join our AOR family to experience the best outback travel Australia has to offer."
