

Recommended tow vehicle wiring V1– Vans built from 2014 to May 2017:
Drum and Disk Brake Systems – NO ESC FITTED TO VAN.

* 12V Ignition or ACC switched positive feed required for use with REDARC BCDC charger fitted in Van to switch relay. Vans fitted with REDARC BMS 1230S2 chargers, may need lower voltage sensing if vehicle has a variable voltage alternator. It is also necessary for vans fitted with satellite dish systems for triggering the automatic retraction safety feature.
