

Recommended tow vehicle wiring V2.2 – Vans built from May 2017 with Hydraulic Disk Brake System.
 STD wiring Includes actuator power supply fitted to 12 pin plug.

* 12V Ignition or ACC switched positive feed to pin 12, may be used with variable voltage alternators to allow vans fitted with REDARC BMS 1230S2 charger to sense lower voltage outputs from tow vehicle. It is also necessary for vans fitted with satellite dish systems for triggering the automatic retraction safety feature.
