20 YEARS OF AUSTRALIAN MANUFACTURING

12 great reasons to join the AOR family

When you buy an AOR, you buy more than just a trailer.
Discover more today australianoffroad.com.au

1. Stay connected

Keep up to date with the AOR family! Follow us on social media and join the AOR Owners Facebook Group.

2. Become a member

Our Owners Forum is a great way to get involved in the community, ask questions and gain insight from vastly experienced owners. From setting up your tow vehicle to the best camping spots, our Owners Forum covers almost every topic.

3. Have complete confidence

With 3 AOR Service Centers and an Australia wide network of over 50 approved service agents, you can have complete confidence travelling in the toughest elements.

4. We back our product

Every new AOR camper comes with a 12-month parts and labor warranty and a promise that your new AOR is free from workmanship or material defects. The chassis and suspension comes with an extended 5-year warranty.

5. Wealth of knowledge

From checklists and maintenance to recalls and safety information, the AOR Knowledge Centre provides access to a range of important know-how's and to-dos.

6. Join the adventures

Sit back and watch incredible travels from the AOR community on AOR TV. Experience superior quality and comfort to truly get remote off road and discover new places or revisit your favourite spots.

7. Meet the family

Our wonderful owners hold annual rallies around Australia. Tagging along to an AOR Owner Rally is a fantastic way to explore this great country, while catching up with old friends and meeting new ones.

8. Ambassador program

If you are passionate about your AOR, we're always looking for brand ambassadors! Rewards for referrals and showing potential customers through your van! Our owners are invaluable to us.

9. Producing with purpose

We all care for our environment and want to experience pristine areas of our beautiful country. Put your mind at ease knowing our off road vehicles minimise the environmental impact of your adventures.

10. The creative heart of the off road industry

AOR are leading innovators in the industry. Everyone innovates the products they produce, but innovation must be tightly controlled. Innovation is accomplished in baby steps, followed by rigorous testing and implementation of new production systems to support the manufacturing processes, otherwise quality will suffer.

11. The best of the best

When you sit in our trailers you relax because everything fits so beautifully. This feeling stays with you during ownership and beyond. In a quality product, form is used to enhance but not intrude on how an object functions. It's easy to make ugly, it costs more to achieve simplicity in function and beauty in form.

12. 100% Australian made

Made in Australia, built for the outback. We have 85 employees and proudly design and manufacture our trailers in our 5000m² purpose-built factory on the Sunshine Coast. You're welcome to pop in for a tour!

What makes a quality off roader?

BODY WIDTH & TRACKING

Designed with a 1950mm wide body, our trailers are built to follow your 4WD down tight bush tracks. The wheels follow along the tracks of your 4WD. Avoid getting bogged and punctures on those tough tracks. Paired with extreme exit and entry angles, you can get to your favourite remote campsite with ease.

*The Aurora is the exception at 2100mm wide.

MAXIMISE FUEL EFFICIENCY

The class leading and cut aways of our trailers maximize fuel efficiency. The quality lightweight materials we use to build the bodies are carefully selected to resist the harsh forces and vibrations of prolonged outback travel.

LIGHTER AND STRONGER

Our trailer bodies are lighter and stronger than ever. We are constantly developing state of the art materials. We are and will continue to be at the forefront of design in the industry.

REMOTE CAPABILITY - BATTERY, SOLAR, TOILET

With huge solar and battery capacities, our trailers are built to stay off road longer. Each trailer is fitted with 300-480 watts of solar and high capacity lithium or AGM battery banks, coupled with the REDARC RedVision and FinScan systems. Connect multiple charging sources to maximise charge amps when you need them most. Combined with the huge 140L macerator toilet system, you won't need to go near civilization for weeks on end.

LOAD CAPACITY & STORAGE

Designed with load capacity in mind, you can take all your water and gear for your long trips up the beach or to the bush. With a payload between 600kg to 900kg (depending on the model), you won't have to worry about fitting in all of your gear! Each trailer is designed to maximize storage and space, from the nose cone to cupboards, soft close drawers and platform bed design. Optional foldaway firewood racks and bike racks are also available.

Resale

We consider the resale value of our car when making the decision to buy new or second hand, so why not our camper? We're proud to say that our trailers have the highest residual resale value in the industry. Our superior quality build and exclusivity creates a value for money product, meaning your investment maintains its value. You can confidently reinvest in our products. Most of our owners continuously upgrade their trailers.

Take only photographs,
leave only footprints

Travel consciously

Our trailers minimise environmental impacts.

Our unique "Nomad" toilet system

Take your toilet wastes with you to dump at a council dump point.

Our water storage systems

Travel remote for extended periods with up to 340L of fresh water.

Solar capacity

Stay in remote areas with self-sufficient solar.

Weight and width

The laminated high-tensile steel chassis and aluminium and fiberglass body construction minimise weight to maximize fuel economy. Tracking behind your 4WD minimises the impact on track conditions.

Take your rubbish with you

Environmentally friendly garbage storage bag attached to spare wheel covers.

Firewood

Bring your own firewood in our firewood storage rack.

Manufacturing waste

From laser and water cut components to recycling, our systems are designed to minimize our waste.

Common questions answered!

DO YOU NEED MORE THAN A QUEEN BED?

The Quantum, Quantum Plus and Matrix Pop Top are the most popular choices for families. The extra internal space allows for a dinette, extra storage, large capacity solar system and up to 340 litres of water (perfect for remote camping areas). The standard features are a full size queen bed with 3 optional bunk areas.

(QUANTUM, QUANTUM PLUS, MATRIX POP TOP)

OR MAYBE YOU LIKE THE IDEA OF SINGLE BEDS TO GIVE YOU MORE INTERNAL SPACE?

Our off road caravan range gives you the option to choose single beds. The full height Quantum, Matrix, Sinergi and Aurora come standard with a queen bed, but you have the option to change to single beds to give you that extra bit of internal space.

(QUANTUM FH, MATRIX, SINERGI, AURORA)

HOW ABOUT A LIFT UP BED?

We have two models featuring a lift up bed. The Odyssey for the compact traveller riding solo or as a couple, and the Eclipse if you're looking for something a bit bigger with generous under-bed storage to store your family's gear. In both models the unique lift up bed design, when positioned in the "Day Mode", converts to enormous internal space providing a four-person lounge/dinette. The Eclipse also allows for an optional bunk, which is perfect for the travelling family.

(ODYSSEY, ECLIPSE)

ENOUGH FOR NOW, BUT MIGHT NEED ROOM TO GROW?

The Sierra ZR and Sierra micro campers are our most versatile trailers, designed with growing young families in mind. The Sierra comes standard with a double bed in a secure bunker style cabin, while the Sierra ZR has the option to add a rood top tent. You can easily option up when the time comes with a range of roof top tent set ups, something to suit every family.

(SIERRA RANGE)

LIKE TO COOK INSIDE?

The Eclipse and Matrix family both provide all the creature comforts of home with stylish European décor, large water storage plus an advanced solar system. The icing on the cake of this design are the two extremely versatile kitchen areas. A large internal kitchen with stainless steel sink, drain board with hot and cold mixer tap, large preparation areas, a 3-burner gas stove with glass top and a 130L upright fridge/freezer come standard. There is also an external sliding stainless steel shelf to suit optional BBQ, with various upgrades available including additional gas bayonets.

(ECLIPSE, MATRIX FAMILY)

OR PREFER YOUR KITCHEN IN THE GREAT OUTDOORS?

The Quantum family come standard with a full external kitchen. Embrace outdoor living with an L-shaped stainless-steel external kitchen, generous pantry areas, a 3-burner gas stove with glass top and an 82L fridge freezer. If you're looking for more useable awning space and more cooking space than any other trailer on the market, the Quantum is for you. Our Sierra range also have a large side mounted kitchen equipped with stainless steel sink, splash back, overhead storage and a dedicated fridge space to option up or BYO.

(SIERRA RANGE, QUANTUM FAMILY)

CAN'T DECIDE, WE CAN DO BOTH!

The Odyssey, Sinergi and Aurora have all the creature comforts of home and more with large water storage plus the benefits of an advanced solar system. Completing their brilliant designs are the two extremely versatile kitchen areas. The standard internal kitchen features a stainless steel sink and drain board with hot and cold mixer tap, large preparation areas, gas stove with glass top and fridge/freezer. The external kitchen includes a sliding stainless steel grill, pantry, hot/cold sink and shelf to suit an optional BBQ. These models are perfect for those wanting the possibility to cook in or outdoors.

(ODYSSEY, SINERGI, AURORA)

IS AN INSIDE TOILET AND SHOWER A MUST?

The Quantum and Matrix model families include an internal hot shower and marine macerator toilet system with 140 litre capacity. These models can also be fitted with grey water tanks plus our new industry leading recycled water system.

(QUANTUM FAMILY, MATRIX FAMILY)

OR WOULD YOU PREFER AN OUTSIDE SHOWER POD?

For the compact campers, the Sierra, Odyssey and Eclipse feature a handy outdoor shower pod. The newly designed rear shower pod features hot/cold water with a bug proof, zipped removable mesh floor for easy cleaning. The lightweight easy to use aluminium pod cover is lockable and totally dust proof.

(SIERRA RANGE (OPT), ODYSSEY, ECLIPSE)

HOW ABOUT A LITTLE MORE LUXURY WITH A FULL ENSUITE?

The Sinergi and Aurora come standard with an internal full ensuite. The Aurora features a marine macerator toilet system with 140 litre capacity and a separate shower and door, the bathroom is equipped with a vanity, large mirror and storage drawers. The Sinergi includes an internal shower, toilet and basin combined. Both models can also be fitted with optional grey water tanks or a recycled water system.

Camping your way

We know that many campers start off small, and have their own gear loaded up and ready to go. With the ZR, almost every- thing is optional - you can option up or bring your own roof top tent, awning, fridge, BBQ and more.

This is to give you more flexibility, and has allowed us to keep the base price affordable for entry level campers.

DISCOVER YOUR

OWN ADVENTURE

Did you know?

The only thing we haven't minimised in designing the Sierra range is quality. Our state of the art electrical and water systems are standard, and the chassis is manufactured in the same way as our top of the range Aurora (with a 5 year warranty).

We back our product and have been manufacturing quality Australian made, dust proof campers for Aussie's to enjoy for over 20 years. So whether you are looking for a weekender or an extensive road tripper, the Sierra is the perfect choice.

- Berth/Bunks 2 + 1

Did you know?

100% dustproof is a big claim but we achieve this in every trailer we build by being fanatical about sealing.

All intrusions through the one-piece fiberglass monocoque body are sealed in production, tested and inspected at two different QC stations. Once assembly is finalised the van is locked up, filled with smoke and pressure tested to 25psi to ensure there are no other leaks outside or under the van. After all it only takes a pin hole to show major dust intrusion if travelling on dirt roads for thousands of kilometers at speed. All trailers with internal cooktops are fitted with our unique filtered air pressure system. This proven system forces clean air into the van at speed resulting in a positive internal pressure thus forcing any dust out of the van if a leak should occur.

100% dust proof

Did you know?

If you're remote camping in national parks, chances are you will rely on your solar system.

Our trailers are fitted with 300 watts of solar power (Aurora 480 watt), linked to the FinScan PowerCORE battery management system. This system supplies double what the trailer requires for normal use, with more in your bank for a rainy day. The panels are light weight and mounted to operate at maximum voltage year-round. We also fit an additional Anderson Plug input circuit suitable for adding an extra solar panel.

SELF-SUFFICIENT, ELEGANT OFF ROAD SUPER CAMPER

Did you know?

We have developed our environmentally conscious macerator toilet system, sourced from the marine industry, over the last 8 years to a highly functional luxury convenience.

It uses no more water than a normal electric cassette toilet as found in all other caravans. The wastes are collected in a 140L black tank which can be disposed at a council or caravan park dump point. Stay remote for longer, with the large capacity tank allowing stays up to seven times that of a normal cassette system).

Designed and fully developed to give you the ultimate outback remote camping experience.

OFF ROAD ENTHUSIAST OUTSIDE LIFESTYLE

Did you know?

Whether you like cooking inside, outside or both, we've got you covered.

The Odyssey and Sierra have a standard external kitchen with an internal fridge (also accessible from outside).

The Quantum and Q+ include state of the art external stainless-steel kitchens with five separate pantry sections. This design allows for maximum living space under the awning.

The Eclipse (optional), Matrix and MPT incorporate internal kitchens with large bench and drawer spaces, and a stainless-steel BBQ slide outside or choose from a variety of external full stainless-steel slide out kitchens.

The Aurora is fitted with a beautiful big functional internal kitchen that can be optioned with a washing machine, microwave or griller. Externally we have also fitted a stainless-steel BBQ slide with two burner grill and sink (with hot/cold water).

COMFORT WITHOUT COMPROMISE

OPTIONAL

Did you know?

Made from composite fibreglass using a monocoque body design, our trailers provide maximum insulation.

With large insulated windows to help control airflow and temperature, you can stay cool in summer and warm through the winter. Optional air conditioning (standard in Aurora) and Webasto Diesel internal space heater (optional in Sierra, Odyssey, Eclipse).

JANUARY 2021

Sinergi

Big brother to the Matrix, the Sinergi is the newest addition to the AOR model range. Pioneered by AOR's Managing Director Steve Budden, the Sinergi is a dual axle off road caravan that is second to none.

Make sure you follow us on Facebook or the Forum for more details on the release!

AURORA 19' FULL HEIGHT CARAVAN

**AURORA IS
DESIGNED FOR
LONG-TERM
REMOTE
TRAVEL
FRESHWATER
STORAGE
FULL ENSUITE,
TWIN AXLE**

TRAVEL OFF ROAD LONGER IN COMPLETE LUXURY

TRAILER

Tare 2515kg
ATM 3400kg
Payload 885kg
Drawbar 175kg
Brakes 12" Disc brakes
Coupling DO35 rated 3500kg
Chassis Supergal high tensile steel powdercoated
Suspension Independent twin trailing arm
Body Fibreglass
Wheels Toyota 200 Series 17" steel rims & 265/70/17 Cooper AT3 tyres & twin spares
Style Full height dual axle

DIMENSIONS

Total overall 7925mm/26'(l)
Body 6285mm(l) 2100(w) 2915mm(h)
Internal 5780mm /19' (l) 2050mm (w)
Awning size 5m x 2.2m

LIFESTYLE

Battery 300 AMP Lithium, FinScan
Inverter 2000W Pure Sinewave
Solar 4 x 120w roof mounted
Heating Webasto diesel
Cooling Dometic air conditioner/2 fans
Gas 2 x 4.5 gas bottles
Water 280L Water storage
Amenities Full ensuite, separate shower/toilet
Toilet Marine Macerator, 140L black tank
Kitchen Internal /External /BBQ slide out
Cooktop Internal 3 burner gas stove, S/S external 2 burner, grill, BBQ slide
Fridge Internal Evakool 175L
Seating Cafe dinette (2p)
Sleeping Queen size bed
Berth/Bunks 2 + 2, single beds option

Did you know?

Inside the trailer, every piece fits and blends into the space to create a beautiful experience.

Creating a comfortable, luxurious home away from home. From the colours and textures used to the care taken by our tradesmen and women, we're dedicated to producing the very best.

decor & ergonomics

What makes an AOR different to other off roaders?

Use our handy buyers checklist when researching for the perfect off road trailer.

The company

- ✓ Is the manufacturer RVMAP accredited? This is necessary for your peace of mind knowing all State, Federal and Industry regulations are complied with.
- ✓ Do they have a large and well-integrated national service network? This increases your access to repair agents trained to repair, warrant and service your trailer.
- ✓ Are they Australian made and manufactured or merely component assembled in Australia?
- ✓ Have you checked out their online owner's forum?

Sleep, appliances

- ✓ Are the fridges vented internally to do away with external vents that will suck dust into the trailer?
- ✓ Does it have a full size queen bed positioned north-south as opposed to a 'camp' size bed or east west bed position where one person has to climb over the other to get out of bed?
- ✓ Are all the appliances suitable for off road travel and able to withstand continued vibration? Ask the manufacturer how they have achieved this.

Construction

- ✓ Is it 100% dust proof? Does the manufacturer guarantee this?
- ✓ Does it have a positive pressure dust suppression system?
- ✓ Does it have off road fully independent coil sprung suspension with twin shock absorber technology?
- ✓ Is the chassis light with torsional stiffness, capable of lasting when taken over torturous corrugations?
- ✓ Is it a suitable width and weight for off road travel? The trailer should be no wider than your tow vehicle with identical track measurements.
- ✓ Is the body full fibreglass construction? Fibreglass bodies are lighter and stronger than conventional aluminium/timber bodies and not susceptible to water and dust ingress. Note: Insurance premiums are cheaper for fibreglass models.
- ✓ Does it have a 10% ball weight whether empty or full with water? This is necessary for safe off road touring on dirt and corrugated gravel roads.
- ✓ Is the spare wheel front or rear mounted for easy access? Underslung spares are cheap to produce but space under the trailer should be used for water tanks. This lowers the centre of gravity of the trailer making it much more stable and safer on corrugated dirt roads.

Pop Tops

- ✓ Ensure it is a full pop top roof not partial as this increases air circulation, awning protection and inside space.
- ✓ Does it have a simple and effective manual lift mechanism with no technology to fail?
- ✓ Is there an additional mechanism to lock the roof of the trailer to the body to stop dust ingress on corrugated dirt roads?

Solar, batteries, water, gas

- ✓ Are the hot water systems, air inlets and door vents covered to stop dust being sucked into the trailer?
- ✓ Are the water tanks protected by a steel guards on all sides?
- ✓ Does it have 340L water tank capacity for extended remote travel?
- ✓ Are the hoses and pipes under the trailer protected from rock spray?
- ✓ Does it have a chemical free macerator toilet with a 110L black water tank so you can go anywhere for extended periods of time, including National Parks? Note that cassette toilets are banned in National Parks.
- ✓ Does it have a gas hot water system? These are the most 12 volt efficient system, a necessary consideration for off road touring.
- ✓ Does it have large solar power capacity? 300W is the minimum requirement for successful long term remote travel.
- ✓ Does it come with options for lithium and AGM batteries?
- ✓ Are the windows lockable with bug and midge proof screens?
- ✓ Is the door a triple lock door with midge proof fly screens that is guaranteed dust proof?

Ask us about our 100% dustproof guarantee!
