- To set the temperature to be achieved in the freezer, press and hold the set (mute) button until the word "SET" appears on the display.
- Let go of the set button and the current set temperature will be displayed and flash.
- To change the current set temperature press the red up arrow (⬆) or red down arrow (⬇) buttons
- Press the set button again to lock in the temperature.
- The symbol "⊖" will appear on the top left hand side of the display when the compressor is running and cooling the unit.
- The unit can be turned off without unplugging the power cable by pressing and holding the red up button until the display turns off.
- Press and hold the red up button again to turn back on.
- The defrost facility has been disabled. To defrost, turn unit off and leave lid open.
- **This unit is designed for use with 12 volt systems only. Use of 24 volt systems will damage this unit and void any warranty.**
