Danfoss Digital Thermostat
Operating Instructions

These instructions relate to Evakool Fridge / Freezers with a Danfoss digital thermostat. These instructions are to be read in conjunction with the Evakool manual that comes with the Fridge / Freezer.

- To set the temperature to be achieved in the freezer, press the set (middle) button and the current temperature will appear (-16 °C is the factory default).

- To change the current set temperature (temperature to be achieved in the freezer section) press the upper or lower buttons.

- Press the set button again to lock in the temperature.

- The settable temperature range is -20 °C to +10 °C.

- The symbol "❄" will appear on the top left hand side of the display when the compressor is running and cooling the unit.

- To turn the unit off press the black power switch towards the sticker labelled "Power Off". To turn the unit back on press the black switch in the other direction (if fitted).

- To defrost, turn unit off and leave lid open.

This unit is designed for use with 12 volt systems only. Use of 24 volt systems will damage this unit and void any warranty.
