

Fold Away Aerial Set Up:

Setting up your antenna in 4 easy steps

1. Tighten the arms if needed, so they are firm but not rigid
2. Set the arms at 10 and 2 o'clock, plug it in to your T.V or T.V via your Amplifier
3. Do an auto Scan and see how many digital TV stations you are getting....

Setting up your antenna in 4 easy steps

1. Tighten the arms if needed, so they are firm but not rigid
2. Set the arms at 10 and 2 o'clock, plug it in to your T.V or T.V via your Amplifier
3. Do an auto Scan and see how many digital TV stations you are getting.
4. Turn the antenna to receive the signal from the repeater.

(If your TV says that you have say 20 stations and you can't see them on your T.V)

Then start changing the element arms (take the antenna down to do this) until you find your happy medium (put the antenna back up), when you are happy with the reception you may like to do another auto tune to see if you can get a few more stations.

Happy Camping
