

## **WARNING**

Test smoke alarm operation after vehicle has been in storage, before each trip, and at least once per week during use. Failure to do so can result in death or serious injury.

## **WARNING**

Do not utilize this RV unless fully set up because a secondary means of escape is not available.  
Can result in death or serious injury.

## **WARNING**

Do not store combustible material in this area. Can cause a fire, which could result in death or serious injury.

## **WARNING**

Do not fill propane container(s) to more than 80 percent of capacity.  
A properly filled container contains approximately 80 percent of its volume as liquid propane.  
Overfilling propane container(s) can result in uncontrolled propane flow, which could lead to a fire or explosion and result in death or serious injury.

## **WARNING**

When using this outdoor cooking area, the vehicle must be level and stabilized.  
Do not violate manufacturers' instructions on required clearances for cooking appliances during use.  
Do not store cooking appliances until cool to the touch.  
Can lead to a fire and explosion and result in death or serious injury.

## **DANGER**

IF YOU SMELL PROPANE

1. Extinguish any open flames and all smoking materials.
2. Shut off the propane supply at the container valve(s) or propane supply connection.
3. Do not touch electrical switches.
4. Open doors and other ventilating openings.
5. Leave the area until the odor clears.
6. Have the propane system checked and leakage source corrected before using again. Ignition of flammable vapors could lead to a fire or explosion and result in death or serious injury.

## **WARNING**

Do not place propane cylinders inside the vehicle.  
Propane cylinders are equipped with safety devices that relieve excessive pressure by discharging propane to the atmosphere. Propane gas is highly flammable.  
Can lead to a fire or explosion and result in death or serious injury.

## **DANGER**

Do not use gas cooking appliances for comfort heating.  
Can lead to carbon monoxide poisoning, which can lead to death or serious injury.

## **WARNING**

Gas cooking appliances need fresh air for safe operation.  
Before operating:  
Open vents or windows slightly or turn on exhaust fan prior to using cooking appliance. Gas flames consume oxygen, which should be replaced to ensure proper combustion. Improper use can result in death or serious injury.

## **WARNING**

This propane piping system is designed for use with propane only.  
Do not connect natural gas to this system. Securely cap inlet when not connected for use. After turning on propane, except after normal cylinder replacement, test propane piping and connections to appliances for leakage with soapy water or bubble solution.  
Do not use products that contain ammonia or chlorine to test for leaks.  
Can lead to a fire or explosion, which could result in death or serious injury.

## **WARNING**

All pilot lights, appliances, and their igniters (see operating instructions) shall be turned off before refueling of motor fuel tanks and/or propane containers.  
Can cause ignition of flammable vapors, which can lead to a fire or explosion and result in death or serious injury.

## **DANGER**

Do not use gas cooking appliances for comfort heating.  
Can lead to carbon monoxide poisoning, which can lead to death or serious injury.

## **WARNING**

Gas cooking appliances need fresh air for safe operation.  
Before operating:  
Open vents or windows slightly or turn on exhaust fan prior to using cooking appliance. Gas flames consume oxygen, which should be replaced to ensure proper combustion. Improper use can result in death or serious injury.

## **WARNING**

Potable water only.  
Sanitize, flush, and drain water tank before using.  
See owner's manual for instructions, care, and maintenance information. Failure to maintain tank can result in death or serious injury.
